Molles

For Honors and Electives

An Evolutionary Perspective

Ecology: Concepts and Applications places great emphasis on helping students grasp the main concepts of ecology while keeping the presentation more applied than theoretical. An evolutionary perspective forms the foundation of the entire discussion. The text begins with the natural history of the planet, considers portions of the whole in the middle chapters, and ends with another perspective of the entire planet in the concluding chapter. Its unique organization, focusing only on several key concepts in each chapter, sets it apart from other ecology texts.

Groundbreaking and Visually Spectacular

This innovative textbook was designed from cognitive and educational research on how students think, learn, and study. Nearly all information in the book is built around 2,600 photographs and stunning illustrations, rather than being presented in long blocks of text not articulated with figures. These annotated illustrations help students visualize geologic processes and concepts. To alleviate cognitive load and help students focus on one important geologic process or concept at a time, the book consists entirely of two-page spreads organized into 19 chapters.

From Slavery to Freedom: A History of African Americans, High School Edition

10th Edition © 2022
Franklin

For African American History

Revered, Respected, and Honored

Since its first edition in 1947, *From Slavery to Freedom: A History of African Americans* has contextualized the Black experience squarely within American history, a narrative that previously denied Black contribution or at best dismissed its importance. An ever-growing mountain of scholarship on African Americans informs the book's discussion of several topics, from the development of metallurgy in ancient African civilizations, through the story of Black life in the British colonies, to the emergence of social movements and activism in communities across the United States from the mid-twentieth century to present day. This edition of *From Slavery to Freedom* also incorporates new historical actors, including the role of women throughout history—particularly in slavery, abolitionism, the Jim Crow era, and the civil rights/Black power movement.

From Slavery to Freedom was written by the late John Hope Franklin, the legendary, award-winning scholar and preeminent historian of African American history. In 1995, President Bill Clinton conferred on Franklin the Presidential Medal of Freedom in recognition of his scholarship in chronicling the African American experience and specifically for his work on this classic title. The 9th and 10th editions introduce co-author, Evelyn Brooks Higginbotham, chair of the African American Studies Department and member of the History Department at Harvard.

This High School Edition Includes:

- Updated discussion of topics based on the latest historical scholarship.
- “Window in Time” features that provide unique vantage points and firsthand views that render multiple, and sometimes conflicting, voices of the past.
- “Shifting Terrains in the New Century” that updates the discussion of African American history through the year 2020.
- High school–appropriate overviews, learning objectives, and key terms with definitions.
- End-of-chapter assessments.
- An online High School Teacher Manual with strategies, lessons, and suggested activities for the high school classroom.
